EXPERIENCE

Research Aide

Oct 2024 – Dec 2025

W. P. Carey School of Business, Arizona State University

Remote

- Orchestrated end-to-end AI workflows by developing a multimodal trajectory prediction pipeline on Waymo Open Dataset using Gemma-2-9B with LoRA fine-tuning, integrating image-to-text encoding and intent prediction.
- Designed and implemented a Hierarchical Cooperative Multi-Agent Human-in-the-loop architecture with Verbalized sampling prompts, reducing runtime by 90% and improving system reliability.
- Built an end-to-end AI incident labeling platform (Python/Streamlit) with causal classification and multilabel taxonomy, reducing manual labeling overhead by 80% across 2,000 incidents.
- Migrated LLM codebase to AWS SageMaker Studio to enhance scalability, reproducibility, and system observability.

EDUCATION

Master of Computer Science, Arizona State University

Dec 2025

CGPA: 4.0. Relevant Coursework: Natural Language Processing (NLP), Data Mining, Statistical Machine Learning, Data Processing at Scale.

PROJECTS

Anime Recommendation System (LLMOps)

Jan 2026 – Feb 2026

Python · LangChain · Groq · ChromaDB · Docker · Kubernetes · Helm · Grafana

- Built an end-to-end RAG-based recommendation system enabling semantic search and conversational AI via Streamlit and Groq LLM.
- Containerized with Docker and deployed to a Kubernetes cluster on GCP, integrating Grafana Cloud for real-time system observability and resource monitoring.
- Optimized performance by caching retriever pipelines and model initialization, significantly reducing query latency.

Student Loan Repayment System

Oct 2025 – Oct 2025

React · FastAPI · MongoDB · Python

- Developed a full-stack AI-powered platform featuring an AI-assisted CSV importer with automated column mapping, reducing manual data entry by 90%.
- Engineered a conversational AI chatbot with state-specific logic to personalize loan projections, enhancing user experience and output structure.
- Achieved sub-second p95 response times via async REST APIs and optimized state management in React.

SKILLS

AI & ML	PyTorch, Hugging Face, NLP, RAG Pipelines, LLM Orchestration, LoRA Fine-tuning, Multimodal
Programming	Python, C++, Java, SQL, Bash
Cloud & DevOps	AWS, GCP, Docker, Kubernetes, Helm, CI/CD, Grafana, Prometheus
Backend & Data	FastAPI, Django, Streamlit, React, MongoDB, ChromaDB, Kafka, REST APIs
